After School Enrichment Program

Classes are filled on a first-come, first-served basis. If a class is filled or cancelled, you will be contacted by the After School Registrar and be reimbursed.

Notification:

Please inform your child's classroom teachers in writing of which Enrichment class(es) they are taking and advise the classroom teachers of ALL schedule changes.

Pick-up:

It is essential that you are punctual at the 1st Street Entrance. Please exit the building quickly as After School is in session and we need to ensure every child's safety. Feel free to socialize outside.

Late Fee Policy:

Pick up is at 4:10pm SHARP. Anyone more than 15 minutes late will be charged \$25.00. Habitual lateness will result in expulsion.

Student Conduct:

The Enrichment Program does not have the same staff resources that are available during the school day. Unfortunately, we may not be able to adequately serve children who repeatedly require one-on-one intervention. Repeated unsafe behavior may result in a student's dismissal from the Enrichment Program.

Drop/Change Policy:

You may change or drop class during the first week and pro-rated refunds will be issued. After the first week there are no refunds and changes may be made only if space is available.

Medical:

Notify Janine DiLorenzo in writing if your child needs an epi pen or inhaler.

WEDNESDAYS (9 classes)

OCT 15, 22, 29 • NOV 5, 12, 19 • DEC 3, 10, 17

Music Start

Music Start provides a fun, appropriate, initial exposure to playing and understanding music. The class will blend: what many kids need- playing the MusicStart keyboard, and what many kids want- playing the guitar.

All foundational musical concepts are covered, making this class a great preparation for, or supplement to, playing any musical instrument. MusicStart and the special MusicStart Keyboard were designed as an improvement over using the traditional recorder to start kids playing, and teach step-by-step problem solving. Instruments are provided. New and repeat students are welcome and will be appropriately challenged.

Flying Machines

Time to take off! Build, fly and take home your very own flying machines! Take an exciting trip into the world of aviation as you build your very own aircraft and watch them soar overhead. This innovative program is an engaging & exciting foray into the world of aviation, and with a diverse array of models to build and take home each class will leave you flying high. We'll tackle a few large models such as the UFO. This unusual looking plane sports a wind-up propeller and its round wings resemble a flying saucer. Don't be fooled- it's capable of taking off straight from the ground just like the big jets! And to prove a great plane doesn't always need a propeller we'll also build the SHREK 2, a classic all-wooden glider. This plane is great for performing loops and stunt tricks and launches with its own special slingshot. We'll also explore the world of motorized craft with the DRAGONFLY. Featuring an electric motor and wide wing span, this plane is great for long flights on windy fall days.

Handmade Artists' Books

In this workshop we will explore making artworks in the form of a book. We will explore & experiment with different ways of constructing handmade books using a variety of materials. We will explore more traditional bookmaking techniques as well as very unconventional, unusual approaches to creating a book. We will use the skills and ideas developed through exploring materials and techniques to create unique works of art in book form. In addition to traditional paper and cardboard, materials to explore will include fabric, found objects, and photographs. Sewing, collage, paper-folding, drawing, writing and painting are some of the mediums you can use to create your artists' books.

Bit Bots Building Workshop

MAKE SOMETHING! LIGHT IT, PUSH IT, TURN IT, TWIST IT, BEND IT, BUZZ IT, BLINK IT, SHAKE IT!

BitBots is a STEM initiative that invites children to innovate, prototype, iterate, design and incorporate new technology with recycled materials to make something that does something, with a focus on the building process more than the end product itself. We use littleBits, simple electronic modules, each with specific functions, which can be snapped together with magnets to create large and elaborate circuits for prototyping and play.

Creative Drawing and Sculpture

In this class you will combine imagination and observation to create amazing, original sculptures, drawings and books. Using our favorite toys, pictures and stories as inspiration, we will build models out of clay, make sculptural collages and create a series of drawings that we will bind into a real book. At the end of the class we will hold an exhibition to show off our amazing creations. This class is perfect for kids who love to make up stories and who love to draw.
